

Create a New Revenue Stream with a WEIMA Shredder

WEIMA America is a leader in size reduction technologies which includes both shredding and briquetting equipment. The printing industry is becoming more conscience of the value of waste paper. Shedding and baling is the best way to prepare waste to receive the highest yield from mills or recyclers. WEIMA's WLK Series shredders are specifically designed for these applications. Machine openings range from 23" – 70" wide based on material stream and volume. WEIMA shredders have large hoppers which enable a "dump & run" process that reduces your

material handling. Unique features, such as the lift-up screen door and anti-vibration feet, ensure safety, ease of maintenance and durability. By realizing the value of your waste paper you will generate a whole new revenue stream for your company.

Please contact WEIMA America for more information at 888-440-7170 or visit our website at www.weimaamerica.com.
