

CRUSHING NEWS

SHREDDING, GRINDING & BRIQUETTING EQUIPMENT // ISSUE 12

Welcome to another issue of **CRUSHING NEWS**, WEIMA's e-newsletter. For over 10 years, WEIMA America has been a market leader in size reduction technology. When it comes to shredding, grinding and briquetting, we're known for building tough, reliable equipment that handles whatever recyclable material you throw in it.

In this issue we share with you a few innovative uses for our shredding and briquetting machinery and, of course, we announce special savings opportunities.

WEIMA Salutes American Ingenuity

In today's tumultuous economic climate true ingenuity shines. We have all come to realize that "business as usual" is no longer the norm. Instead people have to find ways to make things happen when business turns down. In the past six months WEIMA has provided equipment for people to achieve the following great ideas:

- Shred outdated personal hygiene products for materials recovery
- Grind everything in a wood shop from wood waste to documents and then briquette the scrap to burn for fuel
- Shred cardboard to create a briquette which is then sold for fuel
- Recover toner from old print cartridges for an alternative use

We applaud the spirit and ingenuity of WEIMA's customers. As we plow through the year 2009, we will never forget the great ideas created during a tough economy. Do you have garbage that could be another's gold? **Give us a call to discuss how we can help you recycle it for a profit.**
